No. S. B. / 1200 of 1906.

From

SURGEON-GENERAL J. P. GREANY, M.D., I.M.S.,
Surgeon-General with the Government of Bombay;

To

THE SECRETARY TO GOVERNMENT,
General Department, Bombay.

*Bombay, 7th June* 1906.

Sir,

I have the honour to submit, for the information of Government, my Annual Report on the Civil Hospitals and Dispensaries of the Bombay Presidency for the year 1905.

2. On 31st December 1904, there were 662 institutions open. During the year under review, 29 new ones (1 State-Public, 3 Local and Municipal Fund, 2 Private-aided, 21 Private-non-aided and 2 Railway) were opened or shown for the first time, and 16 (1 Municipal and 15 Private-non-aided) institutions were closed, leaving 675 existing on the last day of the year.

3. The total number of patients treated in the institutions of Classes I, III and IV of Statement A appended to the Report was 2,176,392 as compared with 2,134,004 in 1904. Of these, 51,068 were in-door and 2,125,324 out-door patients, against 48,141 and 2,085,863 respectively in the previous year.

4. The number of in-door patients treated in the State-Public Institutions decreased from 33,049 in 1904 to 32,628 in 1905, whereas it increased from 13,839 to 15,840 in the Local and Municipal Fund and from 1,253 to 2,600 in the Private-aided ones. Of the total, 32,387 were cured, 5,121 relieved, 4,600 discharged otherwise, and 5,916 died, the ratio of deaths per cent. to the total admissions being 11·6 as compared with 12·4 in 1904. The number of deaths recorded in the State-Public Institutions was 3,318 or 10·2 per cent. to the total treated against 3,276 or 9·9 per cent. in the previous year. Local and Municipal Fund Institutions returned 2,517 deaths or 15·9 per cent. to the total treated, as compared with 2,627 or 19·0 per cent. in 1904, and the Private-aided Institutions accounted for 81 deaths or 2·1 per cent. of the total treated, against 48 or 3·8 per cent. in the previous year. The daily average strength was 2,042·2 males and 723·3 females, total 2,765·5 as compared with 2,680·7 (males 1,990·6 and females 690·1) in 1904. The number of beds available was 3,417 for males and 1,749 for females as compared with 3,344 for males and 1,669 for females in 1904.

5. Of the out-door patients, 365,479 were treated in the State-Public, 1,692,386 in the Local and Municipal Fund, and 67,459 in the Private-aided Institutions, against 360,007, 1,675,350 and 50,506 respectively in 1904. The total daily average attendance was 12,586·9 males and 6,952·8 females, total 19,539·7, against 18,841·7 (males 12,398·6 and females 6,443·1) in the previous year.

6. There was an increased attendance for all the diseases recorded, except cholera, malarial fevers, scurvy and rheumatic affections. Admissions from small-pox rose from 911 in 1904 to 2,362 in 1905. Dysentery accounted for 32,947 cases or 1·5 per cent. of the total treated, as compared with 29,209 or 1·4 per cent. in 1904. There has again been a lower attendance from those suffering from malarial fevers, the number of patients treated having fallen from 409,098 in 1904 to 397,719 in 1905, the percentage to the total treated being 19·2 and 18·3 respectively. The Deccan Institutions returned 21,090 cases, and the Konkan 5,886 less. The Sind, Gujarát and Foreign Institutions, however, show an increase of 11,610, 3,360 and 627 cases respectively, as compared with

the previous year. The returns from the Sukkur and Lárkána Districts accounted for nearly half the increase in the number of admissions from malarial fevers in the Sind Division, and this increase, the Civil Surgeon, Sukkur, attributes to the inundation of the river Indus, whilst the Civil Surgeon, Shikárpur, ascribes it to defective drainage, in all probability the first is the correct cause. In the Gujarát Division the Ahmedabad and Panch Maháls Districts give an increased attendance of nearly 4,800 and 1,000 cases respectively, due possibly to a heavy rainfall in these districts. Venereal diseases contributed 48,979 or 2·3 per cent. to the total treated, against 46,687 or 2·2 per cent. in 1904. Worms gave 152,135 cases or 7·0 per cent. to the total treated, as compared with 148,158 or 6·9 per cent. in the previous year. Tuberculous diseases caused 8,211 admissions against 7,949 in 1904, the percentage to the total treated remaining the same as in the previous year. 2,131 cases of leprosy were treated against 1,475 in 1904. While rheumatic affections numbered 58,108 as compared with 58,447 in the year previous, the ratio per cent. to the total treated was the same as in 1904. There was an increase over the year 1904 of 13,418 and 5,883 in the attendance for eye and ear diseases, and the percentages to the total treated were 10·0 and 4·3 as compared with 9·5 and 4·1 respectively in 1904. Diarrhœa is credited with 45,200 cases or 2·1 per cent. to the total treated, against 39,945 or 1·9 per cent. in the preceding year. 124,423 cases were due to respiratory affections or 5·7 per cent. to the total treated, as compared with 119,056 or 5·6 per cent. in 1904. There were 250,556 cases of skin diseases against 244,394 in 1904, the percentage to the total treated being the same as in that of the year previous.

7. Of the total treated, 64·5 per cent. were Hindus, 28·6 Mussalmans, 0·7 Europeans and Eurasians, and 6·2 of other castes, as compared with 65·2, 28·2, 0·6 and 6·0 respectively in 1904.

8. The total number of surgical operations was 82,113 as compared with 78,047 in 1904. The patients operated on numbered 80,740, of whom 56,807 were cured, 2,349 relieved, 1,621 discharged otherwise, and 625 died, leaving 701 under treatment on 31st December 1905. The results of the operations performed on 18,637 patients not having been ascertained were not recorded. There were 1,589 tumours and cysts operated on. Operations on bones and joints numbered 2,266. Of the amputations, 522 were for injury, 298 for diseases and 11 for deformities, and, of the total, 53 ended fatally. The skull was trephined in 11 cases with 6 deaths, and the mastoid cells opened thrice with success. Operations on the eye and its appendages included 947 extractions of the lens, 130 iridectomies, 85 excisions and eviscerations of the eyeball, 49 sclerotomies, and 36 lacerations and extractions of opaque capsule. Of the operations on the thorax and breast, 23 were for excision of the breast with 1 death, 31 for paracentesis and aspiration of pleural cavity with 9 deaths, and 13 for thoracotomy with 4 deaths. Operations on the abdomen included 126 operations for hernia, of which 33 were strangulated and 93 were performed for the radical cure with 7 deaths each. In 303 cases the liver was incised for abscess with 80 deaths. Laparotomy was done in 72 cases, resulting in 33 deaths. Operations for removal of vesical calculi included 983 litholapaxies, 352 lithotomies and 42 lithotrities, and of these, 56 ended fatally. Of the operations on the female generative organs, 15 were ovariotomies with 2 deaths, 4 oöphorectomies with 1 death, and 12 abdominal hysterectomies with 2 deaths. Among the obstetric operations forceps were applied in 105 cases with 10 deaths. Version was resorted to in 52 cases and 31 craniotomies were performed with 3 deaths each, and cæsarian section was resorted to in 5 cases of which 1 recovered and 4 died.

9. The total income, exclusive of the cash balance, was Rs. 14,95,593, as compared with Rs. 14,78,259 in 1904. Of this sum, Rs. 7,82,542 were received from Government against Rs. 8,26,865 in the previous year. Local bodies and Municipalities contributed Rs. 1,52,645 and Rs. 3,93,895, as compared with Rs. 1,61,293 and Rs. 3,32,921 respectively in 1904. The interest on invested capital yielded Rs. 34,223 against Rs. 34,017 in the previous year. Securities worth Rs. 4,200 were sold, as compared with Rs. 25,600 in 1904. Subscriptions from Europeans and Natives amounted to Rs. 19,877, or Rs. 8,296 more than

in the previous year. The receipts from paying patients show an increase of Rs. 5,223, as compared with the year 1904, *viz.*, Rs. 73,061 against Rs. 67,838. Miscellaneous receipts amounted to Rs. 35,150 against Rs. 18,144 in 1904.

The total expenditure was Rs. 15,00,392. Deducting therefrom the sum of Rs. 1,02,127 remitted into the treasury on account of hospital fees, sale-proceeds of unserviceable articles, &c., and of Rs. 16,900 invested during the year, the net expenditure was Rs. 13,81,365, as compared with Rs. 13,49,788 in 1904. The cost per patient was 1 pie less than in the previous year, *viz.*, Re. 0-10-1 against Re. 0-10-2. Government paid Rs. 6,80,415 or 49·3 per cent. of the total expenditure, as compared with Rs. 7,30,677 or 54·1 per cent. in 1904. The cost of each diet averaged Re. 0-2-7, or 1 pie less than in the previous year The percentage of the total cost paid by Government for the State-Public Institutions was 81·6, for the Local and Municipal Fund Institutions 21·4, and for the Private-aided Institutions 22·2 as compared with 83·6, 24·1 and 28·9 respectively in 1904. The cost per patient during 1905 in each of these classes was Rs. 1-11-0, Re. 0-6-5 and Re. 0-12-6 against Rs. 1-11-1, Re. 0-5-11 and Re. 0-13-9 in 1904.

10. The total number of patients treated in the State-Special, Railway and Private-non-aided Institutions was 2,020,049 as compared with 1,964,278 in 1904. There is a decrease of 2,637 cases in the in-door admissions, whereas the out-door attendance shows an increase of 58,408, as compared with the previous year. The increase was mainly contributed by the following diseases: —Small-pox (873), dysentery (2,767), malarial fevers (2,473), tubercular diseases (1,096), scurvy (1,714), rheumatic affections (1,119), debility and anæmia (1,123), eye diseases (15,072), respiratory affections (3,488), bowel complaints (8,621) and skin affections (3,685).

11. In all the large Hospitals in Bombay City and in some of those in the mofussil much has been done to bring them up to date, and operation rooms have been improved and provided with impermeable floors, &c., and with aseptic instruments, furniture and fixtures, but still there are a number in the mofussil wanting in this respect, and it is, in my opinion, very necessary that all Government institutions should be brought up to the same standard and the danger of septic contamination prevented or minimised, otherwise many sufferers are likely to be debarred from the benefits of those operations, whose performance the introduction of aseptic principles alone has rendered possible.

12. At the St. George's, Jamsetjee Jijibhoy and allied Hospitals, Goculdas Tejpal and Cama and the Allbless Hospitals in the Presidency Town trained nurses are working, and similar provision exists at the Sassoon Hospital, Poona, European General Hospital, Aden, and Civil Hospital, Karáchi. Nurses are also attached to the West Hospital, Rájkot, and Civil Hospitals of Hyderabad and Sukkur in Sind, but although trained nursing is being extended to mofussil Hospitals, the advance is slow. Modern methods of treatment demand constant skilled attendance to ensure success, and the invariable testimony of those Medical Officers who have trained nurses working with them points to the inestimable value of the measure and indicates the desirability of extending it until all Hospitals in this Presidency are adequately provided with nursing aid.

13. As the result of my inspection of all the Civil Hospitals and many of the larger Dispensaries in the Presidency Proper and from my previous knowledge of similar institutions in Sind and Aden, I am in a position to assure Government that most valuable work is being rendered by the various Medical Officers in charge.

14. During the year under review my office staff has worked well and to my entire satisfaction.

I have the honour to be,
Sir,
Your most obedient Servant,
J. P. GREANY, M.D.,
Surgeon-General, I. M. S.,
Surgeon-General with the Government of Bombay.

# APPENDIX I.

## CIVIL HOSPITAL AND DISPENSARY STATISTICS.

### STATEMENT A.

*Showing the number of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1905.*

[Population of the Province—25,424,235.]

| Class of Dispensary. | Number open on 31st December 1904. | Number opened during the year 1905. | Number closed during the year 1905. | Number open on the last day of the year 1905. | Remarks. |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| I.—State—Public ... | 43 | (*a*) 1 | ... | 44 | (*a*) Dthalla (Aden). |
| II.—State—Special— | | | | | |
| (i) Police ... | 3 | ... | ... | 3 | |
| (ii) Forests and Surveys ... | 1 | ... | ... | 1 | |
| (iii) Canals ... | 1 | ... | ... | 1 | |
| (iv) Others ... | 12 | ... | ... | 12 | |
| III.—Local and Municipal Funds ... ... | 245 | (*b*) 3 | (*c*) 1 | 247 | (*b*) Belgaum Dispensary, and Jaffir Fadoo Dispensary for Females and Ranchor Lines Dispensary (Karáchi).<br>(*c*) Modikhana Hospital (Bombay City). |
| IV—Private—Aided ... | 8 | (*d*) 2 | ... | 10 | (*d*) The Násik Leper Asylum (shown for the first time) and the Mirpur Mathello Dispensary (Sukkur District). |
| V.—Private—Non-aided ... | 305 | (*e*) 21 | (*f*) 15 | 311 | (*e*) Five each in the Thána and Panch Maháls Districts, 4 in the Káthiáwár Agency, 2 each in the Ahmednagar and Ahmedabad Districts, and 1 each in the Bombay City and the Sávantvádi and Pálanpur Agencies.<br>(*f*) Eight in the Thána District, 2 in the Bombay City, and 1 each in the Ratnágiri and Sukkur District, and Southern Mahratta, Mahi Kántha and Káthiáwár Agencies. |
| VI.—Railways ... ... | 44 | (*g*) 2 | ... | 46 | (*g*) Bhávnagar Terminus Railway Dispensary and H. B. Railway Dispensary at Máthi. |
| Total ... | 662 | 29 | 16 | 675 | |

CLASSES I AND II.—These include all institutions maintained by provincial funds and under Government management. The fact that an institution possesses endowments or receives contributions from local funds or private subscriptions has not been regarded as a reason for not classing it as 'state,' when provincial and imperial funds are practically responsible for all the charges connected with it. Class I—'Public' are state dispensaries which are open to the poorer classes of the public. Class II are state dispensaries which serve only a special section of the public as indicated in the sub-classification attached.

CLASS III.—Local fund dispensaries include all institutions which are vested in local boards or municipalities or guaranteed or maintained by local or municipal funds. The fact that such an institution is aided by private subscriptions, or receives assistance from Government in the shape of part of the salary of the medical officer, grants of medicine, or otherwise, has not been regarded as a reason for not classing it as a local fund dispensary, when its existence is practically dependent upon local funds.

CLASS IV.—Comprises institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

CLASS V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior inspection or registers has not been regarded as a reason for not treating it as a private non-aided dispensary.

CLASS VI.—Comprises all railway dispensaries, whether maintained by state railways or others.
